

# Tree Preservation and Protection Plan Requirement Checklist

The following information will be included on a TPP:

- the layout and type of all TPZ barriers to be installed (refer to **Table 3.1: Tree Protection Zones for Individual Specimen Trees**, Ch.3 [Tree Protection Requirements for New Development](#)) including minimum distances measured from the outside of the trunk;
- recommended tree protection measures referenced in the Arborist Report, including construction details, notes and specifications (hand digging, compaction reduction measures, requirements for pruning, excavation, etc.);
- existing and proposed elevations at the base of trees to be preserved;
- proposed structures, driveways and other hard surfaces;
- areas with significant grade changes as per approved grading plans;
- areas of excavation that will require root pruning;
- construction access routes and staging areas as per construction management plans;
- servicing information as per approved servicing plans (including underground services and connections);
- erosion and sediment control measures (areas proposed for temporary stockpiling of fill or excavated material will be fenced with sediment control to prevent sediment runoff);
- Monitoring Notes and Requirements for Inspection Reports (as per the associated Arborist Report);
- Contact information (name, phone number and email) for the Arborist responsible for monitoring and inspection reports; and
- Any additional information required at the discretion of the Town.

## Notes and Details:

- [Light Duty Tree Preservation Fence \(700\)](#) OR
- [Heavy Duty Tree Preservation Fence \(701\)](#), as applicable; AND
- [General Tree Preservation and Protection Notes \(702\)](#); AND
- [Tree Preservation and Protection Zone Signage \(703\)](#).
